SUMMARY

Hands-on technology leader with 20+ years across software, data, cloud, and AI engineering. Specialize in Applied AI & AI-driven transformation for Fortune 500 enterprises across 4 areas: modernizing digital and data estates, infusing AI across the engineering stack, building vertical AI systems for industry processes, and architecting platform enablers (agentic platforms, MCP, evals, trust). Accountable end-to-end from strategy through architecture through production

TECHNICAL SKILLS

AI & Agentic Engineering: Reasoning, orchestration, MCP, RAG, multi-agent systems, eval frameworks, context layers

Platforms & Engineering: AWS, Azure, Databricks, Kafka, Python, FastAPI, Java, full-stack distributed systems, FinOps, DORA, LangGraph, Autogen, Tiger, Neo4j, DBT Semantics

PROFESSIONAL EXPERIENCE

Fractal Analytics – VP, AI Engineering

Palo Alto, CA | May 2024 – Present

- Partnering with CIOs, CAIOS & CDOs to assess digital and data estates, designing agentic interventions that reduce TCO and improve run operations, including automated ticket triaging and actionable FinOps
- Driving horizontal AI transformation across engineering, data, platform, and SRE, embedding AI-native tooling and agentic workflows to improve productivity, quality, and SDLC velocity enterprise-wide
- Delivering vertical AI systems: MCP servers, evaluation frameworks, context layers, and process automation for Fortune 100 pharma, payors, CPG, and financial services enterprises
- Deployed Fractal's Enterprise Agentic Platform for Fortune 500 clients, cutting knowledge retrieval & synthesis from 48 hours to under 15 minutes across 50+ users and 7 data sources

Fractal Analytics – Head of Engineering, North Americas

Palo Alto, CA | May 2023 – May 2024

- Led 80+ North America engineering team delivering consulting and technical solutions for Fortune 500 clients
- Drove engineering transformations measured by KPIs across productivity, infrastructure, and DORA metrics
- Led strategic technical partnerships with Azure, Databricks, and Glean for co-innovation and enterprise adoption

Databricks – Data & AI Solution Architecture Lead

India | Nov 2021 – May 2023

- Led India's largest Databricks-based data transformations & cloud data modernizations for enterprises
- Pioneered early adoption & influenced product design for Unity Catalog, User Federation, and Serverless

McKinsey & Co, QuantumBlack – Principal & Expert, Engineering

Chicago | Jul 2018 – Nov 2021

- Led teams across MLOps, data engineering, data strategy, platform modernizations for manufacturing, pharma, FS
- Delivered one of Asia's first end-to-end MLOps platform consulting and adoption for a distributed enterprise

Morgan Stanley, Accenture, Fractal Analytics - Staff Software Engineer Across Mumbai & Chicago | 2005 – 2018

- Built enterprise software: low-latency real-time pricing engines, risk management systems; scaled analytics practices across healthcare, insurance, and CPG

EDUCATION, PUBLICATIONS & CERTIFICATIONS

Bachelor of Engineering (B.E.), Electronics & Telecommunication, Rajiv Gandhi Technical University, India, 2004

AWS Certified Solution Architect | SAS Certified Base SAS9 Developer | MongoDB Certified **Publications**

LinkedIn (Reco Systems & Big Data Challenges), JavaCodeGeeks
